REJECTION CODE:

(A) Permanent Expansion Exceed 10% (B) Excessive Elastic Expansion (C) Cylinder Leaks (D) Failed Visual Inspection
Above tested cylinders qualify for "+" rating in accordance with CFR requirements. Yes No X

NOTE:

An additional 5 years requalification will be allowed provided the terms and conditions as outlined in DOT-SP 14857 are met.

WARNING:

The test results on these cylinders are not to be taken as an assurance that the cylinders are impervious to catastrophic rupture and explosion if exposed to excessive heat, fire, traumatic impacting, corrosion, etc. Testing notwithstanding, cylinders cannot possibly be made entirely safe and impervious to every conceivable hazard. Transport and handle with care.

Maximum allowable expansion limits determined;
Table 2c, CGA Pamphlet C-5--1991:

Reaffirmed 1995: N/A

Stamped Manufacturer REE: N/A

I hereby certify that the above cylinders were
and Compressed Gas Association guidelines.

Gauge Verification

Serial Number: 310020005
