

Tom Sewell, President of Tulsa Gas Technologies, Inc.

Tulsa Gas Technologies is a compressed natural gas service company that has become the largest manufacturer of CNG dispensers in North America by providing top of the line equipment and unmatched service. TGT specializes in both high volume CNG dispenser installations and single unit jobs with custom specifications. With a continued emphasis on service, TGT has been a leader in CNG technology for twenty years and its products are currently used all across the United States, and in ten countries around the world.

Tulsa Gas Technologies is an aggressive and open-minded company, researching new types of equipment and their uses, and blending new technologies with existing equipment. It is this kind of talent that has brought TGT to the front as a leader in the alternative fuels equipment supplier business throughout the world.

TGT was on the ANSI 2 Standards Committee, the NGV Standards Committee, and in 2014, Company President Tom Sewell chaired the Oklahoma School Transportation Task Force.
